

CIRCUIT DESCRIPTION

TRANSMITTER SECTION

Frequency Determining & Stabilizing Circuit:-

Q2 functions as a oscillator with VC, C3 & C2 as part of the feedback network. Adjusting VC & C3 determining the frequency.

RF Amplification :-

The output of Q2 at its collector is fed to the antenna.

Miscellaneous

IC1 function as Decoder.

R4 act as resistor of Decoder.

R7 act as oscillating resistor of Decoder.

R6 act as emitter resistor
